

VISION 2000

FLEXIBLE PACKAGING SOLUTIONS

MAIN FEATURES

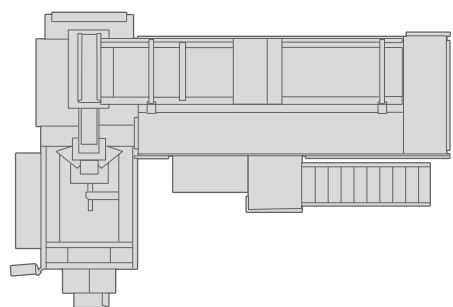

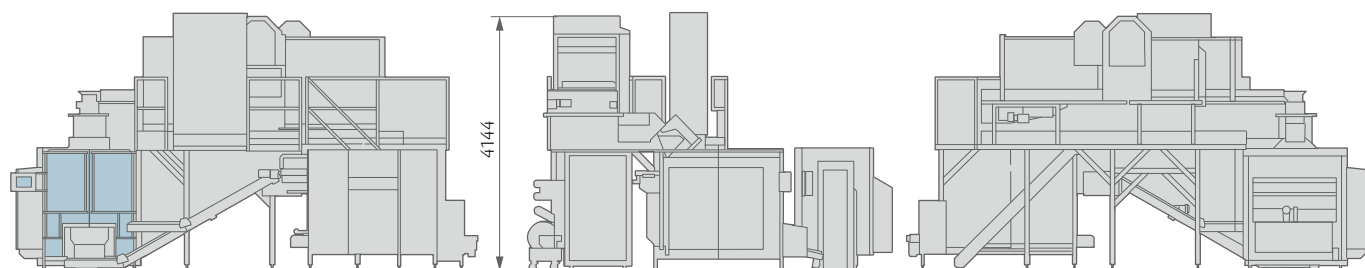

- 1 • Vision counting by camera system
- 2 • Clean design in stainless steel
- 3 • High Speed Counting up to 100.000 pcs/hour
- 4 • Box filling system

The Vision 2000 counts and feeds baked goods into boxes or the infeed of a VFFS machine at high speed with over 99% accuracy. The Vision 2000 offers complete flexibility in terms of product type, shape and size. It can accommodate fresh, par-baked, frozen and difficult-to-handle raw dough products, whether baguettes, pretzel sticks, rolls, bagels, donuts or croissants. Key to the flexibility of the belt-based system is a powerful line scan camera.

BENEFITS

- 1 • Ideal to feed products in bulk at a very high speed / suitable for fragile products
- 2 • Designed for easy cleaning and a simple maintenance aimed to minimize downtime
- 3 • Fast speed with great accuracy
- 4 • Long products such as whole or half baguettes can be counted into a box after being oriented by an aligner linked downstream to the counting machine

TECHNICAL DATA

Version	"CleanDesign" in Stainless Steel
Capacity/hours	up to 100.000 pieces/h*
Machine Control	Siemens
Electrical Supply	220 V / 400 V / 480 V, 3 phases, N, Gnd 50Hz / 60Hz
Operating Pressure	80 psi
Air Consumption	approx. 8 cfm/min

* optional
