TAPING

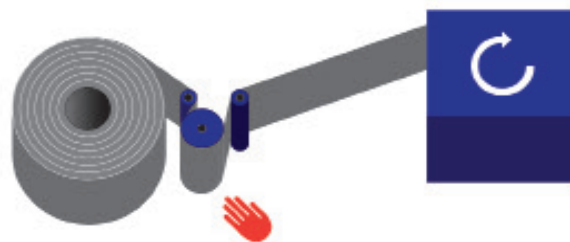

The CST 201 film wrapping machine is an entry-level model for semi-automatic wrapping of pallets. The machine is easy to operate thanks to the clear and simple button functions. Replacing the roll of film is simple and can be done quickly. There are recesses in the base plate, so that the wrapper can easily be moved with a forklift truck.

**Most important features:**

- Adjustable turntable speed
- Adjustable film trolley speed
- Adjustable number of lower and upper windings
- Pallet height scan
- Mechanical brake
- Rainproof program
- Manual adjustment: turntable speed, film trolley

**Options:**

- Larger turntable
- Scale
- Loading ramp
- Roping (load to be secured on the pallet)

The mechanical brake is adjustable
